

This is my blog (sort of or information dump place 😊) where I try to make information publically available that is hopefully of some value to you:

A list of all articles that I have written so far and also the ones that I still intend to write in the future can be found here.

2018/12/14: **Netbooting of a SLES 11 SP4 PowerVM LPAR with an AIX NIM Server**

This article shows how to netboot a SLES 11 SP4 PowerVM LPAR with the help of an AIX NIM Server (and also Linux DHCP Server).

2018/12/13: **Netbooting of a RHEL 6.9 PowerVM LPAR with an AIX NIM Server**

This article shows how to netboot a RHEL 6.9 PowerVM LPAR with the help of an AIX NIM Server (and also Linux DHCP Server).

2018/12/12: **Netbooting of a SLES 12 SP3 PowerVM LPAR with an AIX NIM Server**

This article shows how to netboot a SLES 12 SP3 PowerVM LPAR with the help of an AIX NIM Server (and also Linux DHCP Server).

2018/12/11: **Netbooting of a RHEL 7.5 LE PowerVM LPAR with an AIX NIM Server**

This article shows how to netboot a RHEL 7.5 little endian PowerVM LPAR with the help of an AIX NIM Server (and also Linux DHCP Server).

2018/12/08: **Netbooting Linux on Power**

This article discusses how to perform a network boot of Linux on Power.

2018/12/06: **Linux on Power boot loader**

This article discusses the Linux on Power boot loader.

2018/11/16: **Shared Storage Pool**    

This article shows an exemplary setup of a PowerVM VIOS Shared Storage Pool.

2018/11/10: **Using AIX loopback devices**    

This article shows how you can mount ISO image from AIX in a similar fashion as on Linux.

2018/11/05: **Introduction to AIX Mirror Pools**    

This article gives an introduction to AIX Mirror Pools.

2018/10/15: **Nagios/Icinga plugin: Checking the battery state of an IBM SIS SAS adapter**

   

This article describes how to check the battery state of an IBM SIS SAS adapter from a Nagios/Icinga plugin executed by NRPE.

2018/10/12: **Running a Nagios/Icinga plugin as root from NRPE**    

This article describes how to run a Nagios/Icinga plugin which requires root privileges from NRPE.
